

ePRO ALL-ELECTRIC  
**REFRIGERATED  
VEHICLES**

# OVERVIEW

The ePro Cooler is an electric reefer van with **150 miles of range** featuring an integrated refrigeration system powered by the EV battery. The **120-hour, no-idle runtime** keeps up to 3,000 lbs of cargo as cool as 32°F with automatic defrost and open-door shut off to save energy. A **30 minute recharge** puts long routes in reach, while networked controls help the ePro work for your fleet.

# SPECIFICATIONS

- 150 mile range from full charge
- 25 minute recharge (5-80%) via DC Fast Charger
- 120 hour standalone reefer runtime from a full charge
- 32°F minimum operating temp
- 3,000 lb payload on a class 2b vehicle
- 8' 6" Clearance - No Rooftop Condenser

# CARGO FEATURES

- Capacity for (3) 48"x48" pallets
- Diamond plate floor & kick plates
- E-track tie downs
- Strip curtains for efficiency
- Quick-release cargo clearance bar
- Bright LED lighting

# CONTROLS

## Mobile Vehicle Management

- Monitor your fleet via the Maxwell Portal
- View location, status, and adjust settings
- Diagnostics and alerts

## Convenient Cabin Control Panel

- Single button on/off
- View status, current temp, & set point

# CHARGING

## Market Leading Capabilities

- J1772 / CCS Chargeport
- 11kW Max Level 2 AC (6 Hours)
- 200kW Max DC Fast Charge (30 MIN)
- 1,480W Integrated Solar Roof (optional)
- Adjustable max SOC and charge rate via Maxwell Portal

# MAINTENANCE

- Online service manual [maxwellvehicles.com/service](http://maxwellvehicles.com/service)
- Portal & display show faults; no special tools needed.
- Replace the refrigerant desiccant bag every 3-years
- Replace the A/C compressor every 2,500 hours, or 2 years, whichever comes first.
- System flush and recharge whenever the A/C compressor is serviced.
